

FILLABLE BASE
RL80

FEATURES

Wide Fill Hole
A thoughtfully designed opening that allows easy and efficient filling with water or sand, giving you the flexibility to adjust the weight for optimal balance and durability.

2-Piece Construction
Featuring a versatile two-part design, each section can be filled independently with your choice of water or sand, providing customizable stability to suit any setup.

Fill Hole Cap
Designed for secure sealing, this cap prevents leaks and spills, offering a mess-free solution for filling and ensuring stability once the base is set.
