

GROUND ANCHOR
TB60

FEATURES

Durable Auger Blade
The built-in drill tip is specially designed for easy penetration into sandy ground, ensuring stability and durability even in challenging conditions.

Handle Retention Bolt
A sturdy screw bolt connected by a cable and a turning bar at its end, providing reliability and preventing disconnection during use.

Integrated Turning Handle
A convenient turning bar is stored within the unit and can be inserted at the top to serve as a handle for effortless drilling into the ground.

All-in-One, No-Assembly Design
The unit is fully integrated, with the turning bar secured by a cable and screw and the drill tip built in—offering ease of use with no assembly required.
